The algorithm for providing a pharmacist with the proper medical information on the drug in the process of pharmaceutical care:

Action of the drug

✓ Why a patient needs this drug

✓ Which symptoms of the disease will disappear and which will not

✓ When the drug effect will appear

✓ What happens in case of the incorrect use or withdrawn of the drug

Side effects

✓ What side effects may occur

✓ How to recognize them

✓ How long can they last

✓ How serious they are

✓ What should be done

Conditions of the rational drug administration

✓ How to take the drug

✓ When to take the drug

✓ How long to continue the treatment

✓ How to store the drug

✓ What to do with drug residues

Warning

✓ When it is not allowed to take the drug

✓ What the maximum dose is

✓ Why it is necessary to undergo the full treatment course

✓ Why it is necessary to be treated for a limited period and to consult a doctor

Information control

✓ Ask the patient if everything is clear to him

✓ Ask the patient to repeat the most important information

✓ Find out if the patient has some questions
